Dear Dr. Rebelo

hereby I would like to apply for a postdoctoral position at your institution.

My name is Lucia Hosekova and I have recently defended my PhD thesis at the University of Zurich in Switzerland under supervision of Prof. Ansgar Denner. At the moment, I hold a position at Instituto de Fisica Corpuscular (IFIC) in Spain as an Early-Stage Researcher supported by LHCPHenoNet Initial Training Network.

Since my Master studies, my research activities have been focused on collider phenomenology, in particular on perturbative QCD and multi-leg calculations. My present project involves calculating next-to-leading order QCD corrections for vector boson fusion processes at the LHC. Further details about my work and interests can be found in the enclosed CV and research history statement.

I have asked Prof. Ansgar Denner, Dr. German Rodrigo and Dr. Karol Kovarik to send their recommendation letters to you.

Sincerely,
Lucia Hosekova
