Dear Prof G Branco,

I am a research scholar working in HEP Phenomenology. I have been awarded PhD from Punjabi University, Patiala (INDIA), under the supervision of Prof R C Verma. My field of research interest so far is mainly weak decays and properties of heavy flavor hadrons.

Presently, I am working as a post doc at Yonsei University, Seoul. I came to learn that your institute is accepting applications for Postdoctoral Research positions. I am looking forward to such an opportunity where there scope to learn under the directions of several field experts. I am a hard working person who is struggling to get an entrance in such an environment.

I wish to apply for same in your institute. So far I have been working within Standard Model framework. I want to expand my experiences particularly in Physics Beyond Standard Model. I know It is going to be difficult to get an entrance to your institute. I just need one chance I promise that I will not leave any stone unturned with my hard work.

I would really be grateful to you if you will give me an opportunity to work under your directions. I know you must be looking for a candidate within your field work but I am applying to learn under your guidance.

Please, find attached herewith my RESUME including list of publications.

With Best Regards
Rohit Dhir
